

REMARKS

By this Amendment claim 6 has been amended to specifically state that the defined further transducer is placed on the casing of the hearing aid at a location where wind exposure is low and no means for wind protection is provided. In this way, the criticism of the examiner in her Advisory Action of July 27, 2006 is addressed. Otherwise, the applicants' arguments regarding the examiner's prior art rejection as set forth in the Amendment of July 11, 2006 are herein repeated.

A prompt allowance of this application is requested.

Respectfully submitted,

By:
